The Inclusion of National Culture in Education by Social Media

Dr. Ajay Krishan Tiwari*

*Teacher Educator & Research Guide, Sr. Lecturer, CTE / BTTC - G.V.M & Former H.O.D Department of Education- IASE Deemed to be University, Sardarshahar.

Abstract

If we call the media century of the 21st century, there will be no exaggeration. New dimensions in the field of education have created a spate of important achievements in the education world. In which the popularity of media dominated everywhere. The media has presented an authentic record of the Yashogatha of the ideological sacrifice of the national and freedom fighters not only in the present day but also in the freedom struggle.

Keywords: national culture, social media, nationalism, emotional unity, communalism, regionalism, corruption and party politics

Preface

National culture is a sentiment, a value, an inspiration, a power to plan for nation development that binds the various castes, religions, sects and linguistic people living in a certain geographical range into one thread. For the progress and development of any country, it is very important to have a sense of nationalism among the residents of the country, which tries to bind the nation in a formula which is presently needed, education is important in developing the spirit of national culture. Can contribute.

Before independence, there was a strong sense of nationalism and culture of nation devotion. Despite the diversities, the ancient Indian culture maintained a sense of geographical integration and nation love. Indian culture has a glorious history of assimilating other cultures. But at the present time there has been rapid disintegration in the form of national and emotional unity. Regional and ethnic sentiments are emerging. Social and national problems, such as ethnicity, communalism, regionalism, corruption and party politics, have become a challenge before the nation, due to which national unity has become a complex problem. The main reason for this is the lack of moral, social, cultural and spiritual values. Part-time poisonous politics has done the task of setting ghee on fire.

As a result, the path of nation development has been blocked. Today, both our nation and national culture have a severe crisis. The mentality and intellectualism created by the influence of modern Western civilization and culture has put a question mark on both nation and national culture. Today the nation is crumbling and disintegrating at the hands of politics. The present politics has so narrowed and dissociated the national culture and the feeling of nationalism that today the existence of the nation is imprisoned in the family and nationalism means the race to capture or preserve power. The nation of the village head is limited to the village and MP, M.P., M.L.A. Is limited to its constituency. This type of sickness in relation to the nation: The result of this situation is that today a village head, serpent wants to do his own benefit by doing harm to his neighboring village. A clear example of this has been seen in the recent elections. The unity that binds the entire nation, it is breaking and breaking the link of national culture. The concept of nation and society has ended in the mind. Social and national interests have become secondary to personal interests and family and ethnic interests.

For a developing country like India which has been a slave of slavery for years, it is absolutely necessary that strengthening national culture and
unity is very important to avoid the dangers of communalism, casteism and regionalism and this work can be done by the national media in education. Culture can be cultivated and improved. Our country is a country of different cultures, which has its own identity throughout the world. Different In spite of culture and language, we are all bound together in one thread and always be ready to keep the unity and integrity of the nation intact. This can be done through positive use of social media in education.

Social media has led to the emergence of all the aspirations and possibilities of mass movement and public awareness, which is a matter of pride for India. Today, through TV channels, Facebook, Twitter Whatsapp and Acute, public awareness and public awareness came not only among the common people but also in the youth, by awakening the public consciousness among the students, they have become aware of the freedom movement, national values, consciousness of culture.

In today's era, social networking has become an important part of our life, most people have become accustomed to it. If you want to reach something easily among the public, then just share it on some social networking. While the social networking site is a very good way to meet your friends, on the other hand, you can also discuss serious issues such as the development and promotion of national culture and get public opinion. Now-a-days large educational programs are also being conducted by social media, for example educational programs sponsored by NB Debate Chatham, which are gradually proving popular among youth and students.

In the last few years, due to scientific progress, the revolutionary changes in the procedures of social media have completely changed the human life-style. The opening of many new channels and broadcasting of various new educational programs on them affect our lives in many ways. Channels like 'Discovery' and 'Gyan Darshan' are providing full support to fulfill the objective of spreading the knowledge of Doordarshan.

The dissemination of special classes and programs of universities organized by the University Grants Commission (NBD) is dedicated to the students and youth. Apart from this, such programs are also broadcast on Doordarshan which is helpful in keeping our national culture, our heritage alive, but the number of such enlightening and cultural channels and programs is so small that they can be counted on the finger. On the other hand, there are a lot of channels and programs which are constantly trying to destroy our national culture. In fact, the social media has brought us to such a cultural juncture today, where a strong wave of vulgarity and vulgarity and stupidity is drowning us in the trough of degradation. Although all the systems of social media have promoted upscale in the society from their own level, but being the most popular and intelligent, various channels of Doordarshan have had the most impact on every section of the society.

The programs which are broadcast on the channels and other social media have the greatest impact on the students and youth at the upper secondary level. Because of their very sensitive brain, these teenagers, these young people who see or hear them. They start incorporating them in their habits. They cannot distinguish practical truth and artificiality. As a result, they try to do such things in practical life which are made possible by special effects in cameras / studios and are broadcast on the social media which results in increasing crime. The origin of such pathology in the child and young heart is really a disaster on our affectionate culture.

Therefore, the need is based on the need that the social media should realize its responsibility properly, while using it to provide its significant contribution in the development of national culture, its development so that democracy is a strong pillar, the security guard of the nation, the carrier of the spirit of nationalism, in education. Playing the glorious role of motivator of national values, the whole world was forced to say this - Good Hindosta of all where we-our...
